

Features

- Integrated analog input Class D audio amplifier driver in a small 16 pin package
- Floating inputs enable easy half bridge implementation
- Programmable bidirectional over-current protection with self-reset function
- Programmable preset deadtime for improved THD performances
- Start and stop click noise reduction
- High noise immunity
- ± 100 V ratings deliver up to 500 W in output power
- Operates up to 800 kHz
- Leadfree, RoHS compliant
- Automotive Qualified^T

Product Summary

V_{OFFSET} (max)		± 100 V
Gate driver	Io+ (typical)	1.0 A
	Io- (typical)	1.2 A
Selectable Deadtime		25/40/65/105 ns
OC protection delay (max)		500 ns
DC offset		<20 mV
PWM frequency		~800 kHz
Error amplifier open loop gain		>60 dB
THD+N* (1kHz, 50W, 4 Ω)		0.01 %
Residual Noise* (AES-17 Filter)		200 μ Vrms

* measured with recommended circuit

Typical Applications

- Automotive mini component stereo systems
- Automotive powered speaker systems
- Automotive audio power amplifiers

Description

The AUIRS2092 is a high voltage, high performance Class D audio amplifier driver with PWM modulator and protection. In conjunction with two external MOSFET and a few external components, a complete Class D audio amplifier with protection can be realized.

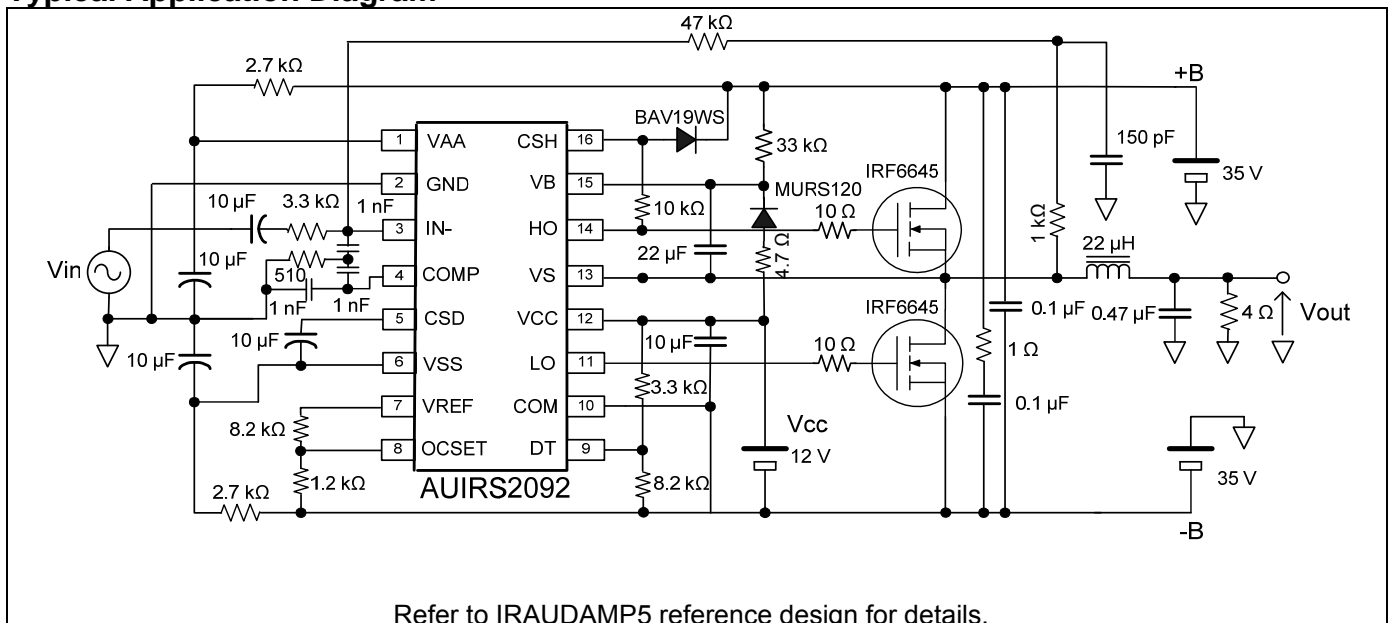

International Rectifier's proprietary noise isolation technology allows high current gate drive stage and high speed low noise error amplifier reside on a single small silicon die.

Open elements of PWM modulator section allow flexible PWM topology implementation.

Simplified Block Diagram

Typical Application Diagram

Refer to IRAUDAMP5 reference design for details.

Qualification Information[†]

Qualification Level		Automotive (per AEC-Q100 ^{††})	
		Comments: This family of ICs has passed an Automotive qualification. IR's Industrial and Consumer qualification level is granted by extension of the higher Automotive level.	
Moisture Sensitivity Level		SOIC16N	MSL3 ^{†††} 260°C (per IPC/JEDEC J-STD-020)
ESD	Machine Model	Class M2 (+/-150V) (per AEC-Q100-003)	
	Human Body Model	Class H1B (+/-750V) (per AEC-Q100-002)	
	Charged Device Model	Class C3A (+/-750V) (per AEC-Q100-011)	
IC Latch-Up Test		Class II, Level B ^{††††} (per AEC-Q100-004)	
RoHS Compliant		Yes	

† Qualification standards can be found at International Rectifier's web site <http://www.irf.com/>

†† Exceptions to AEC-Q100 requirements are noted in the qualification report.

††† Higher MSL ratings may be available for the specific package types listed here. Please contact your International Rectifier sales representative for further information.

†††† CSD pin stressed to +/-20mA, CSH pin stressed to +/-40mA, DT and OCSET pins stressed to +/-20mA

Absolute Maximum Ratings

Absolute Maximum Ratings indicate sustained limits beyond which damage to the device may occur. All voltage parameters are absolute voltages referenced to COM lead. Stresses beyond those listed under "Absolute Maximum Ratings" may cause permanent damage to the device. These are stress ratings only; and functional operation of the device at these or any other condition beyond those indicated in the "Recommended Operating Conditions" is not implied. Exposure to absolute-maximum-rated conditions for extended periods may affect device reliability. The thermal resistance and power dissipation ratings are measured under board mounted and still air conditions. Ambient temperature (T_A) is 25°C, unless otherwise specified.

Symbol	Definition	Min	Max	Units
V_B	High side floating supply voltage	-0.3	220	V
V_S	High side floating supply voltage (Note2)	$V_B - 20$	$V_B + 0.3$	
V_{HO}	High side floating output voltage	$V_S - 0.3$	$V_B + 0.3$	
V_{CSH}	CSH pin input voltage	$V_S - 0.3$	$V_B + 0.3$	
V_{CC}	Low side fixed supply voltage (Note2)	-0.3	20	
V_{LO}	Low side output voltage	-0.3	$V_{CC} + 0.3$	
V_{AA}	Floating input positive supply voltage (Note2)	(See I_{AAZ})	210	
V_{SS}	Floating input negative supply voltage (Note2)	-1 (See I_{SSZ})	GND + 0.3	
V_{GND}	Floating input supply ground voltage	$V_{SS} - 0.3$ (See I_{SSZ})	$V_{AA} + 0.3$ (See I_{AAZ})	
I_{IN-}	Inverting input current (Note1)	---	±3	mA
V_{CSD}	SD pin input voltage	$V_{SS} - 0.3$	$V_{AA} + 0.3$	V
V_{COMP}	COMP pin input voltage	$V_{SS} - 0.3$	$V_{AA} + 0.3$	
V_{DT}	DT pin input voltage	-0.3	$V_{CC} + 0.3$	
V_{OCSET}	OCSET pin input voltage	-0.3	$V_{CC} + 0.3$	
I_{AAZ}	Floating input positive supply zener clamp current (Note2)	---	20	mA
I_{SSZ}	Floating input negative supply zener clamp current (Note2)	---	20	
I_{CCZ}	Low side supply zener clamp current (Note3)	---	10	
I_{BSZ}	Floating supply zener clamp current (Note3)	---	10	
I_{OREF}	Reference output current	---	5	
dV_S/dt	Allowable V_S voltage slew rate	---	50	V/ns
dV_{SS}/dt	Allowable V_{SS} voltage slew rate (Note3)	---	50	V/ms
P_d	Maximum power dissipation @ $T_A \leq +25^\circ\text{C}$	---	1.0	W
R_{thJA}	Thermal resistance, Junction to ambient	---	115	°C/W
T_J	Junction Temperature	---	150	°C
T_S	Storage Temperature	-55	150	°C
T_L	Lead temperature (soldering, 10 seconds)	---	300	°C

Note1: IN- contains clamping diode to GND.

Note2: $V_{DD} - IN+$, GND - V_{SS} , $V_{CC} - COM$ and $V_B - V_S$ contain internal shunt zener diodes. Please note that the voltage ratings of these can be limited by the clamping current.

Note3: For the rising and falling edges of step signal of 10 V. $V_{SS} = 15\text{ V to } 200\text{ V}$.

Recommended Operating Conditions

For proper operation, the device should be used within the recommended conditions below. The V_S and COM offset ratings are tested with supplies biased at $V_{AA}-V_{SS}=10\text{ V}$, $V_{CC}=12\text{ V}$ and $V_B-V_S=12\text{ V}$. All voltage parameters are absolute voltages referenced to COM; all currents are defined positive into any lead.

Symbol	Definition	Min.	Max.	Units	
V_B	High side floating supply absolute voltage	$V_S + 10$	$V_S + 18$	V	
V_S	High side floating supply offset voltage	(Note 1)	200		
I_{AAZ}	Floating input positive supply zener clamp current	1	11	mA	
I_{SSZ}	Floating input negative supply zener clamp current	1	11		
V_{SS}	Floating input supply absolute voltage	0	200	V	
V_{HO}	High side floating output voltage	V_S	V_B		
V_{CC}	Low side fixed supply voltage	10	18		
V_{LO}	Low side output voltage	0	V_{CC}		
V_{GND}	GND pin input voltage	V_{SS} (Note 3)	V_{AA} (Note 3)		
V_{IN-}	Inverting input voltage	$V_{GND} - 0.5$	$V_{GND} + 0.5$		
V_{CSD}	CSD pin input voltage	V_{SS}	V_{AA}		
V_{COMP}	COMP pin input voltage	V_{SS}	V_{AA}		
C_{COMP}	COMP pin phase compensation capacitor to GND	1	-		nF
V_{DT}	DT pin input voltage	0	V_{CC}		V
I_{OREF}	Reference output current to COM (Note 2)	0.3	0.8	mA	
V_{OCSET}	OCSET pin input voltage	0.5	5		
V_{CSH}	CSH pin input voltage	V_S	V_B	V	
dVss/dt	Allowable Vss voltage slew rate upon power-up (Note4)	-	50	V/ms	
I_{PW}	Input pulse width	10 (Note 5)	-	ns	
f_{SW}	Switching Frequency	-	800	kHz	
T_A	Ambient Temperature	-40	125	°C	

Note 1: Logic operational for V_S equal to -5 V to $+200\text{ V}$. Logic state held for V_S equal to -5 V to $-V_{BS}$.

Note 2: Nominal voltage for V_{REF} is 5.1 V . I_{OREF} of $0.3 - 0.8\text{ mA}$ dictates total external resistor value on V_{REF} to be $6.3\text{ k}\Omega$ to $16.7\text{ k}\Omega$.

Note 3: GND input voltage is limited by I_{AAZ} and I_{SSZ} .

Note 4: V_{SS} ramps up from 0 V to 200 V .

Note 5: Output logic status may not respond correctly if input pulse width is smaller than the minimum pulse width.

Electrical Characteristics

Unless otherwise noted, these specifications apply for an operating junction temperature range of $-40^{\circ}\text{C} \leq T_j \leq 125^{\circ}\text{C}$ with bias conditions of $V_{CC}, V_{BS} = 12\text{ V}$, $V_{SS} = V_S = \text{COM} = 0\text{ V}$, $V_{AA} = 10\text{ V}$, $C_L = 1\text{ nF}$.

Lead Assignments

Parameter Temperature Trends

Figures illustrated in this chapter provide information on the experimental performance of the AUIRS2092S HVIC. The line plotted in each figure is generated from actual lab data. A large number of individual samples were tested at three temperatures (-40 °C, 25 °C, and 125 °C) in order to generate the experimental curve. The line consists of three data points (one data point at each of the tested temperatures) that have been connected together to illustrate the understood trend. The individual data points on the Typ. curve were determined by calculating the averaged experimental value of the parameter (for a given temperature).

IMPORTANT NOTICE

Unless specifically designated for the automotive market, International Rectifier Corporation and its subsidiaries (IR) reserve the right to make corrections, modifications, enhancements, improvements, and other changes to its products and services at any time and to discontinue any product or services without notice. Part numbers designated with the "AU" prefix follow automotive industry and / or customer specific requirements with regards to product discontinuance and process change notification. All products are sold subject to IR's terms and conditions of sale supplied at the time of order acknowledgment.

IR warrants performance of its hardware products to the specifications applicable at the time of sale in accordance with IR's standard warranty. Testing and other quality control techniques are used to the extent IR deems necessary to support this warranty. Except where mandated by government requirements, testing of all parameters of each product is not necessarily performed.

IR assumes no liability for applications assistance or customer product design. Customers are responsible for their products and applications using IR components. To minimize the risks with customer products and applications, customers should provide adequate design and operating safeguards.

Reproduction of IR information in IR data books or data sheets is permissible only if reproduction is without alteration and is accompanied by all associated warranties, conditions, limitations, and notices. Reproduction of this information with alterations is an unfair and deceptive business practice. IR is not responsible or liable for such altered documentation. Information of third parties may be subject to additional restrictions.

Resale of IR products or serviced with statements different from or beyond the parameters stated by IR for that product or service voids all express and any implied warranties for the associated IR product or service and is an unfair and deceptive business practice. IR is not responsible or liable for any such statements.

IR products are not designed, intended, or authorized for use as components in systems intended for surgical implant into the body, or in other applications intended to support or sustain life, or in any other application in which the failure of the IR product could create a situation where personal injury or death may occur. Should Buyer purchase or use IR products for any such unintended or unauthorized application, Buyer shall indemnify and hold International Rectifier and its officers, employees, subsidiaries, affiliates, and distributors harmless against all claims, costs, damages, and expenses, and reasonable attorney fees arising out of, directly or indirectly, any claim of personal injury or death associated with such unintended or unauthorized use, even if such claim alleges that IR was negligent regarding the design or manufacture of the product.

IR products are neither designed nor intended for use in military/aerospace applications or environments unless the IR products are specifically designated by IR as military-grade or "enhanced plastic." Only products designated by IR as military-grade meet military specifications. Buyers acknowledge and agree that any such use of IR products which IR has not designated as military-grade is solely at the Buyer's risk, and that they are solely responsible for compliance with all legal and regulatory requirements in connection with such use.

IR products are neither designed nor intended for use in automotive applications or environments unless the specific IR products are designated by IR as compliant with ISO/TS 16949 requirements and bear a part number including the designation "AU". Buyers acknowledge and agree that, if they use any non-designated products in automotive applications, IR will not be responsible for any failure to meet such requirements.
