

Svetlana SV6L6GC High Performance Audio Beam Power Tetrode

he Svetlana SV6L6GC is a glass envelope beam-power tetrode intended for highpower audio amplifier service. Close manufacturing specification tolerances and improved processing provide improved reliability and superior sonic performance. The Svetlana SV6L6GC is manufactured in the Svetlana factory in St. Petersburg, Russia, and is designed to be a direct replacement for any 6L6 type.

The Svetlana SV6L6GC features:

- Design and construction based on the Sylvania 6L6GC/STR387
- Extra-rugged construction for use in music amplifiers--thick mica spacers and extra bracing reduce microphonic effects and resist mechanical and thermal shocks
- Increased peak cathode emission from new cathode materials
- Gold-plated grid and extended processing and aging for stability and reliability
- Tri-plate anode for superior dissipation
- Precise grid/screen alignment
- · Comprehensive static and audio amplifier testing before and after aging
- May be operated in inverted position--base fits into socket clamps in Fender guitar amplifiers

General Characteristics

	min	typ	max		
Heater Voltage (AC or DC)	5.7	6.3	6.9		V
Heater Current @6.3V		0.9			A
Cathode:		oxide	-coated, unip	ootenti	ial
Cathode-to-heater potential			±200		V
Direct interelectrode capacitances :					
Grid no. 1 to plate			0.6		рF
Grid no. 1 to cathode, heater, grid	d no. 2, and b	eam forming pl	ates 10		pF
Plate to cathode, heater, grid no.	2, and beam	forming plates	6.5		рF
Mechanical					
Operating position					Any
Base			Large wafe	r octal	8-pin
Basing diagram			J	IEDEC	7AC
Cooling		R	adiation and	l conve	ection
Envelope temperature (max)				2	250 C
Nominal dimensions:					
Diameter			38.8mn	n (1.52	28 in.)
Base to top			93mn	n (3.60)5 in.)
Overall height			108mn	า (4.25	52 in.)
Diameter of base			34mn	n (1.33	39 in.)
Net weight				65 g	grams
Maximum ratings					
DC plate voltage VP			5	00	V
Screen grid voltage Vg2			5	00	V
Plate Dissipation				30	W
Screen Grid Dissipation				5	W

Svetlana SV6L6GC High Performance Audio Beam Power Tetrode

Typical Operation, Class A, Audio Power Amplifier, Single Tube Connection

	tetrode	triode	
DC plate voltage	350	250	V
Screen grid voltage	250		V
Control grid bias voltage	-18	-20	V
Peak AF grid voltage	18	20	V
Zero-signal plate current	54	40	тA
Maximum-signal plate current	66	44	тA
Zero-signal screen grid current	2.5		тA
Maximum-signal screen current	7		тA
Plate resistance (approx)	33000	1700	ohms
Transconductance (approx)	5200	4700	μS
Load Resistance	4200	5000	ohms
Total harmonic distortion	15	5	%
Maximum signal power output	10.8	1.4	W
Typical Operation, Class AB ₁ , Audio P	'ower Amplifier (Values for two tub	ies)
DC plate voltage		450	V
Screen grid voltage		400	V
Control grid bias voltage		-37	V
Peak AF grid-to-grid voltage		70	V
Zero-signal plate current		116	тA
Maximum-signal plate current		210	тA
Zero-signal screen grid current		5.6	тA
Maximum-signal screen current		22	тA
Load Resistance, plate-to-plate		5600	ohms
		5000	••••••
Total harmonic distortion		1.8	%
