

## Standard recovery Diode

### Features

1. Medium voltage, high current rectifier diodes with slim package for lowest thermal resistance
2. Low power dissipation
3. Especially suited for water cooling
4. Forward selections for paralleling available

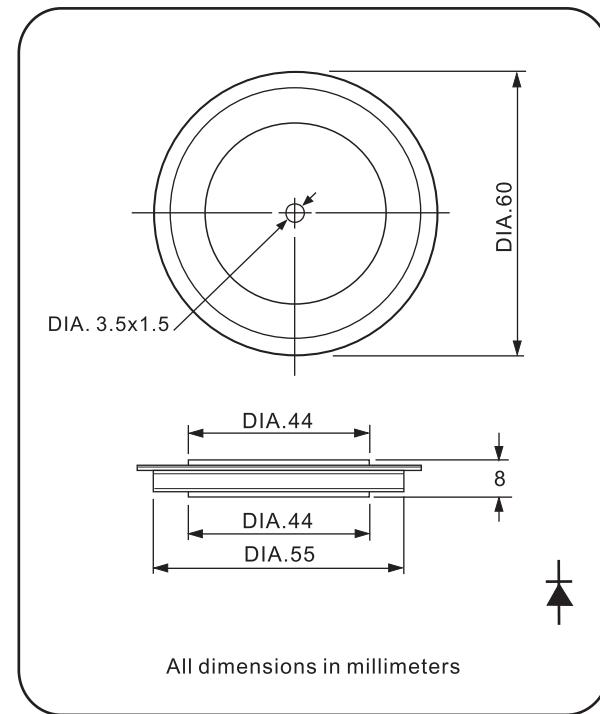

### Typical Applications

- Welders
- Electrode plating

Ordering code

|     |      |     |     |
|-----|------|-----|-----|
| D   | 7100 | W   | XX  |
| (1) | (2)  | (3) | (4) |

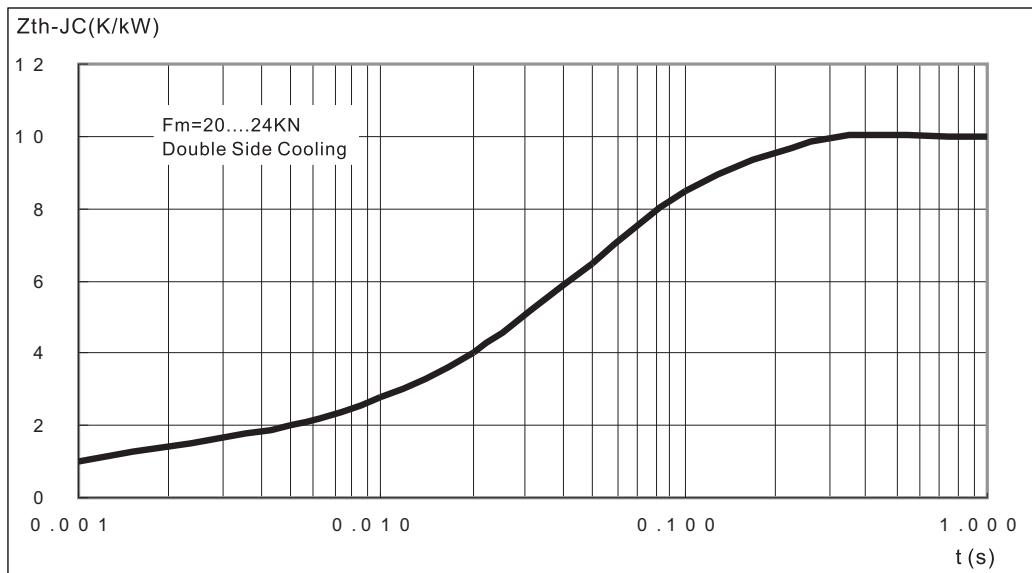

- (1) stands for disc types diodes  
 (2) Maximum average forward current , A  
 (3) peakage style  
 (4) Voltage code , V ( code x 100 = VR<sub>RRM</sub> )

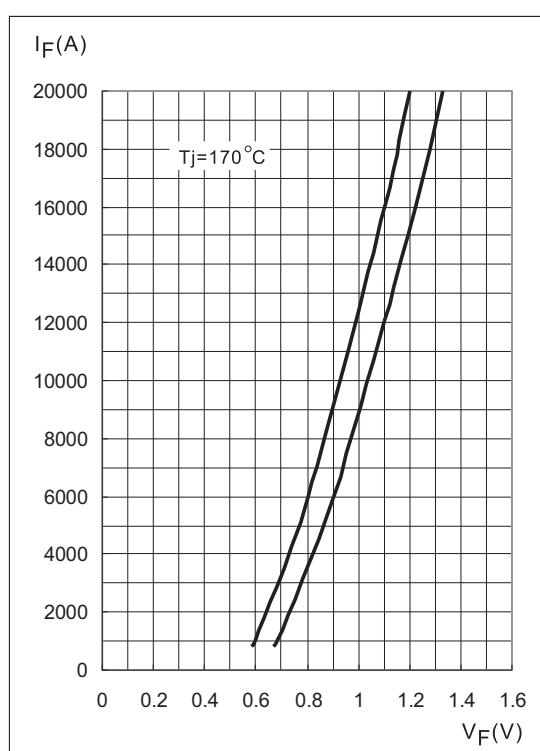

### Electrical Characteristics

| Symbol                      | Parameter   | Condition  | Value      | Unit              |
|-----------------------------|---|--|------------|-------------------|
| I <sub>F(AV)</sub>          | Average forward current                             | 180° half sine wave , 50 Hz<br>Double side cooled , T <sub>C</sub> =85°C | 7100       | A                 |
| V <sub>RRM</sub>            | Repetitive peak reverse voltage                     | t <sub>p</sub> =10 ms V <sub>RSM</sub> =V <sub>RRM</sub> +100V           | 200 to 600 | V                 |
| I <sub>RRM</sub>            | Repetitive peak reverse current                     | V <sub>R</sub> =V <sub>RRM</sub>   | 50         | mA                |
| I <sub>FSM</sub>            | Surge forward current                               | 10ms half sine wave<br>V <sub>R</sub> =0.6V <sub>RRM</sub>               | 55000      | A                 |
