

## **OVERVIEW**

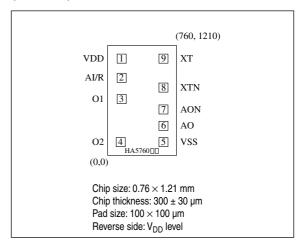

The CF5760 series are analog clock ICs that derive their timing from a 32.768 kHz oscillator element. They feature a reset function (optional seconds control function) which can be used to maintain accurate time. Various alarm functions and motor outputs are available to match a wide range of clock specifications.

#### **FEATURES**

- 1.2 to 2.0V operating supply voltage
- 1.2µA (typ) / 1.5V current consumption
- 32.768 kHz oscillator circuit
- $\blacksquare$  Oscillator capacitance  $C_G$  and  $C_D$  built-in
- Alarm output function
- Reset function (optional seconds control function)
- Input chattering elimination function (AI/R)
- Chip form (CF5760××)

## PAD DESCRIPTION/DIMENSIONS

No.	Name	Description	Dimensions [µm]			
NO.	Name	Description	Х	Y		
1	VDD	Supply	155	1065		
2	Al/R	Alarm input and reset input	155	854		
3	01	Motor output 1	155	620		
4	O2	Motor output 2	145	145		
5	VSS	Ground	615	145		
6	AO	Alarm output 1	615	325		
7	AON	Alarm output 2	615	505		
8	XTN	Oscillator output	615	746		
9	XT	Oscillator input	615	1065		

### **SPECIFICATIONS**

## **Absolute Maximum Ratings**

Parameter	Symbol	Condition	Rating	Unit
Supply voltage range	$V_{DD} - V_{SS}$		-0.3 to 5.0	V
Input voltage range	V <sub>IN</sub>		$V_{SS} \le V_{IN} \le V_{DD}$	V
Operating temperature range	T <sub>opr</sub>		-30 to 80	°C
Storage temperature range	T <sub>stg</sub>		-65 to 150	°C

### **Electrical Characteristics**

 $Ta = 25^{\circ}C, V_{DD} = 1.5V, V_{SS} = 0V, C_G = 23pF, C_D = 25pF, X'tal \ (f_0 = 32.768kHz, C_I = 50k\Omega \ max) \ unless \ otherwise the contraction of the contracti$ erwise noted

Parameter	Cumbal	Condition		Unit			
Parameter	Symbol	Condition	min	min typ		Oill	
Operating voltage	V <sub>DD</sub>		1.2	-	2.0	V	
Current consumption	I <sub>DD</sub>	O1 = O2 = open	-	1.2	4.0	μΑ	
Oscillator start-up time	t <sub>STA</sub>	V <sub>DD</sub> = 1.2V	-	_	5.0	s	
Motor output current	I <sub>MOT</sub>	$V_{DD} = 1.2V, R_L = 200\Omega^1$	4.0	-	-	mA	
AI/R HIGH-level input current	I <sub>IH</sub>	V <sub>DD</sub> = 1.5V	2	4	8	μΑ	
AI/R LOW-level input current	I <sub>IL</sub>	V <sub>DD</sub> = 1.5V	2	4	8	μA	
Oscillator frequency stability	Δf/f	V <sub>DD</sub> = 1.2 to 2.0V	-	0.5	1.0	ppm/0.1V	
Alarm LOW-level output current <sup>2</sup>	I <sub>OL1</sub>	V <sub>DD</sub> = 1.5V, V <sub>OL</sub> = 0.75V	900	2000	-	μΑ	
(AO, AON)	I <sub>OL2</sub>	$V_{DD} = 1.5V, V_{OL} = 0.75V$	10	30	_	μΑ	
Alarm HIGH-level output current <sup>2</sup>	I <sub>OH1</sub>	V <sub>DD</sub> = 1.5V, V <sub>OH</sub> = 0.75V	900	2000	-	μΑ	
(AO, AON)	I <sub>OH2</sub>	V <sub>DD</sub> = 1.5V, V <sub>OH</sub> = 0.75V	10	30	-	μΑ	
F output voltage <sup>3</sup>	V <sub>F</sub>	V <sub>DD</sub> = 1.2V, C <sub>L</sub> = 50pF	0.4	_	_	٧	
Internal capacitance <sup>4</sup>	C <sub>G</sub>		Refer to the SERIES LINEUP		INELID	pF	
ппеттаг сараспансе	C <sub>D</sub>		Helel to the Schies Lineup			pF	

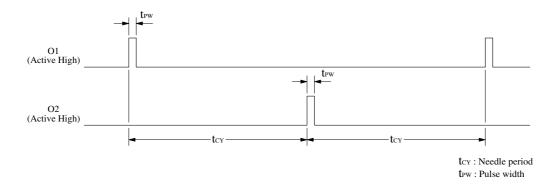

R<sub>L</sub> is the load resistance connected between O1 and O2.
CF5760AA/ CC/ FC/ HA: If the outputs (AO or AON) are short circuit, the output current is I<sub>AO</sub> ≥ 900 μA.
The Fourth voltage rating, V<sub>F</sub>, when a load capacitance, C<sub>L</sub>, is connected between pin F and VSS, is the difference voltage between the center voltage.

age,  $0.5V_{DD}$ , and the peak voltage. 4.  $C_G$  is the capacitance between VDD and XT.  $C_D$  is the capacitance between VDD and XTN.

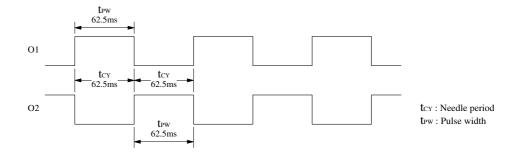

### **FUNCTIONAL DESCRIPTION**

## **Motor Output**

## Motor output waveform (step motor driver)

### Motor output waveform (sweep motor driver)

## Input Chattering Elimination Function (AI/R)

A bounce delay is provided on the AI/R input to eliminate erroneous operation caused by input bounce (chattering).

 $t_{ON}$  < 62.5ms: input is ignored. 62.5  $\leq$   $t_{ON}$   $\leq$  125ms: indeterminate  $t_{ON}$  > 125ms: input is accepted.

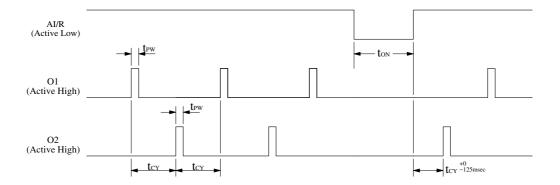

## **Input Control Functions**

When AI/R is open circuit, a 256Hz signal is output.

When AI/R is HIGH or LOW, it selects the alarm (HIGH)/reset (LOW) function or reset (HIGH)/alarm (LOW) function depending on the version.

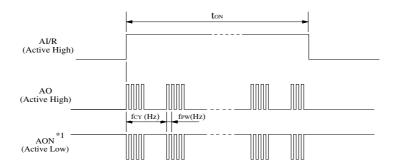

## **Reset Function (optional seconds control function)**

When AI/R goes active level for a reset, the motor output stops. When the reset is released, the first motor output pulse occurs on the output pin opposite to that which had the last output pulse immediately before the reset.

### **Alarm Output**

### Alarm output waveform

<sup>\*1:</sup> Opposite phase to AO.

## **F Output Function**

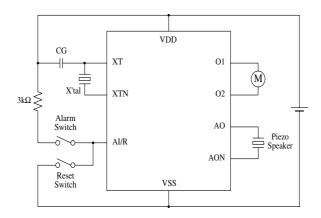

The AON pin may be replaced by the F pin which is used to output a 32kHz signal (unaffected by the reset function).

f<sub>PW</sub> = alarm fundamental frequency

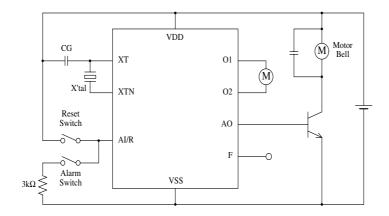

f<sub>CY</sub> = alarm modulation frequency

## **TYPICAL APPLICATION CIRCUITS**

# Alarm (HIGH)/Reset (LOW), Piezoelectric alarm

# Reset (HIGH)/Alarm (LOW), DC Output, F Output

Please pay your attention to the following points at time of using the products shown in this document.

The products shown in this document (hereinafter "Products") are not intended to be used for the apparatus that exerts harmful influence on human lives due to the defects, failure or malfunction of the Products. Customers are requested to obtain prior written agreement for such use from SEIKO NPC CORPORATION (hereinafter "NPC"). Customers shall be solely responsible for, and indemnify and hold NPC free and harmless from, any and all claims, damages, losses, expenses or lawsuits, due to such use without such agreement. NPC reserves the right to change the specifications of the Products in order to improve the characteristic or reliability thereof. NPC makes no claim or warranty that the contents described in this document dose not infringe any intellectual property right or other similar right owned by third parties. Therefore, NPC shall not be responsible for such problems, even if the use is in accordance with the descriptions provided in this document. Any descriptions including applications, circuits, and the parameters of the Products in this document are for reference to use the Products, and shall not be guaranteed free from defect, inapplicability to the design for the mass-production products without further testing or modification. Customers are requested not to export or re-export, directly or indirectly, the Products to any country or any entity not in compliance with or in violation of the national export administration laws, treaties, orders and regulations. Customers are requested appropriately take steps to obtain required permissions or approvals from appropriate government agencies.
