

CM1454

Data Port EMI Filter Array with ESD Protection

Description

The CM1454 is an EMI filter array with ESD protection in a CSP form factor for the data port of a mobile handset. The CM1454-08 is configured in an 8 channel format and combines both resistor-capacitor (R-C) and inductor-capacitor (L-C) filters in the chip. There are five C-R-C filters with component values of 30 pF – 100 Ω – 30 pF which are used for the microphone and data ports. There are also three C-L-C filters with values of 80 pF – 3 nH – 80 pF which are designed for the stereo speaker port.

The CM1454's C-RC filters have a cut-off frequency of 60 MHz and an attenuation of better than 35 dB over the 800 MHz to 2.7 GHz frequency range. The C-L-C filters have a cut-off frequency of 21 MHz with an attenuation of 40 dB at 1 GHz. The parts integrate ESD protection diodes on every pin that provide a very high level of protection for sensitive electronic components against possible electrostatic discharge (ESD). The ESD protection diodes connected to the filter ports are designed and characterized to safely dissipate ESD strikes of ±15 kV, which is beyond the Level 4 requirement of the IEC61000-4-2 international standard. In accordance with MIL-STD-883 (Method 3015) specification for Human Body Model (HBM) ESD, the pins are also protected for contact discharges at greater than ±30 kV.

The CM1454 incorporates *OptiGuard™* which results in improved reliability at assembly. The CM1454 is available in a space saving, low profile Chip Scale Package with RoHS compliant lead-free finishing.

Features

- *OptiGuard™* Coated for Improved Reliability
- Eight Channels of EMI Filtering
- Three C-L-C Filters with ESD Protection for Stereo Speaker Port
- Five C-R-C Filters with ESD Protection for Microphone and Data Ports
- ±15 kV ESD Protection on Each Channel (IEC 61000-4-2 Level 4, Contact Discharge)
- ±30 kV ESD Protection on Each Channel (HBM)
- Chip Scale Package (CSP) Features Extremely Low Parasitic Inductance for Optimum Filter and ESD Performance
- 20-Bump, 3.960 mm x 1.586 mm Footprint CSP
- These Devices are Pb-Free and are RoHS Compliant

Applications

- Combination I/O Data Port that has I/Os for Data, Microphone and Speaker
- I/O Port Protection for Mobile Handsets, Notebook Computers, PDAs, etc.
- EMI Filtering for Data Ports in Cell Phones, PDAs or Notebook Computers
- Wireless Handsets
- Handheld PCs / PDAs

APPLICATION INFORMATION

Table 5. PRINTED CIRCUIT BOARD RECOMMENDATIONS

Parameter	Value
Pad Size on PCB	0.240 mm
Pad Shape	Round
Pad Definition	Non-Solder Mask defined pads
Solder Mask Opening	0.290 mm Round
Solder Stencil Thickness	0.125 – 0.150 mm
Solder Stencil Aperture Opening (laser cut, 5% tapered walls)	0.300 mm Round
Solder Flux Ratio	50/50 by volume
Solder Paste Type	No Clean
Pad Protective Finish	OSP (Entek Cu Plus 106A)
Tolerance – Edge To Corner Ball	±50 μm
Solder Ball Side Coplanarity	±20 μm
Maximum Dwell Time Above Liquidous	60 seconds
Maximum Soldering Temperature for Lead-free Devices using a Lead-free Solder Paste	260°C
