

# “Slot Seven” 7 mm Tunable Inductors

This product will not be available in an RoHS-compliant version. Core contains lead.

These versatile Coilcraft variable inductors operate over a wide range of frequencies. Standard inductance values are available from less than 100 nH to over 250  $\mu$ H. Custom values may also be available.

Coilcraft “Slot Seven” RF coils come in an international 7 mm package. Their precision-molded slotted bobbins ensure tight tolerances and high stability.

All parts come with a metal can that provides electrostatic shielding. The ferrite sleeve on the 7M3 series provides higher inductances and additional magnetic shielding. “Slot Seven” coils are tuned by means of slotted ferrite tuning cores for easy, positive adjustment. Use the Coilcraft Slot Tuner for a precise fit to the tuning slug.

Coilcraft **Designer’s Kit M106** contains 39 coils (3 each). To order, please contact Coilcraft or purchase on-line at <http://order.coilcraft.com>.

## Schematic

Dimensions are in  $\frac{\text{inches}}{\text{mm}}$

**Terminations** Pins: Tin-lead over tin over copper over iron  
Shield can tabs: Tin-silver over nickel over brass

**Weight** 7M2 series 1.00 – 1.06 g  
7M3 series 1.30 – 1.34 g

**Resistance to soldering heat:** Wave solder only. Recommended maximum board surface temperature of 168°C (334°F) for no more than three seconds. Pre-heating is recommended to minimize time over the solder nozzle.

## “SLOT TUNER” TUNING TOOL

Specially designed for this product series. SEE INDEX

# “Slot Seven” 7 mm Tunable Inductors

## Series 7M2 — Shielded with Plastic Sleeve

Part Number	L min ( $\mu\text{H}$ )	L nom ( $\mu\text{H}$ )	L max ( $\mu\text{H}$ )	L and Q test frequency	Q min @ L nom	DCR max (Ohms)

Parts in bold are included in Coilcraft Designer's Kit M106.

## Typical Q at L nom — Series 7M2

### Notes:

1. All readings taken on Agilent/HP 4342-A Q Meter.
2. L min is achieved at maximum extension of the core toward PC board. Complete tuning range is reached within the boundaries of the coil form.
3. All specifications are at standard “Q” meter frequencies. L and Q readings change with frequency.
4. Shielded parts have a sleeve insert to protect the winding.
5. Operating temperature range  $-40^{\circ}\text{C}$  to  $+85^{\circ}\text{C}$ .
6. Electrical specifications at  $25^{\circ}\text{C}$ .
