## HERMETIC TO-3 FIXED VOLTAGE REGULATORS APPROVED TO DESC DRAWINGS

**Three Terminal, Fixed Voltage, 1.5 Amp  
Precision Positive Regulators In Hermetic  
JEDEC TO-3 Package**

### FEATURES

- Output Voltages: 5V, 12V, 15V
- Output Voltages Set Internally to  $\pm 1\%$
- Built-In Thermal Overload Protection
- Short Circuit Current Limiting
- Similar To Industry Standards 7805, 7812, 7815
- Hi-Rel Screening Available

### DESCRIPTION

These three terminal positive regulators are supplied in a hermetically sealed metal TO-3 package. All protective features are designed into the circuit, including thermal shutdown, current limiting and safe-area control. With heat sinking, they can deliver over 1.5 amps of output current. These units feature internally trimmed output voltages  $\pm 1\%$  of nominal voltage. These units are ideally suited for Military applications where a hermetically sealed package is required.

#### Notes:

- Load and Line Regulation are specified at a constant junction temperature. Pulse testing with low duty cycle is used. Changes in output voltage due to heating effects must be taken into account separately.
- Short Circuit protection is only assured up to V<sub>IN</sub> = 35V.
- If not tested, shall be guaranteed to the specified limits.  
The • denotes the specifications which apply over the full operating temperature range.
- Minimum load current for full line regulation = 5.0 mA.
