Working Conditions

- 1) No severe mechanical shock as impact and drop off in the process of transportation, storage and working of product.
- 2) Storage conditions
 - Temperature: 5~40°C
 - Relative humidity: $\leq 45\%$
 - Storage time: 3 days for the open package; 3 months for the closed package
- 3) Welding conditions
 - Recommended solder component: Sn63Sb37 (or lead-free solder of liquid quadrant less than 240°C)
 - Recommended soldering conditions: shown in Table 1
- 4) Welding in the gate spot is recommended to be completed one-time by using fixture. If it is necessary to use a soldering iron, the temperature of soldering iron is controlled within 280°C and time is controlled within 20s.
