

#### **■** Features

- · 3 pole AC inlet IEC320-C14, Class I power unit
- Medical safety approved (2 x MOPP) accroding to ANSI/AAMI ES60601-1 and IEC/EN60601-1
- · Extremely low leakage current
- No load power consumption<0.15W</li>
- Energy efficiency level VI and meet CoC Version 5
- -30~+70°C wide range working temperature
- · Protections: Short circuit / Overload / Over voltage / Over temperature
- · LED indicator for power on
- Lifetime > 85 K hours
- 3 years warranty

## Applications

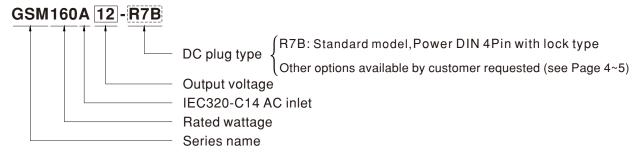

- Mobile clinical workstation
- Oral irrigator
- · Portable hemodialysis machine
- · Breath Machine
- Medical computer monitor

## Description

GSM160A is a highly reliable, 160W desktop style single-output green medical adaptor series. This product is equipped with a 3-pin (with FG) standard IEC320-C14 power plug, adopting the input range from 80VAC to 264VAC. The entire series supplies different output voltages between 12VDC and 48VDC that can satisfy the demands for various kinds of medical electrical devices. The circuitry design meets the international medical standards ( $2^*MOPP$ ), having an ultra low leakage current ( $<100\mu A$ ), fitting the medical devices in direct electrical contact with the patients.

With the efficiency up to 94% and the extremely low no-load power consumption below 0.15W, GSM160A is compliant with USA EISA 2007/DoE, Canada NRCan, Australia and New Zealand MEPS, EU ErP,and meet Code of Conduct (CoC) Version 5. The supreme feature allows the adaptor to save the energy when it is either under the operating mode or the standby mode. The entire series utilizes the 94V-0 flame retardant plastic case. GSM160A is approved with the international medical safety certificates.

- All parameters are specified at 230VAC input, rated load, 25 € 70% HH ambient.
   DC voltage: The output voltage set at point measure by plug terminal & 50% load.
   Ripple & noise are measured at 20MHz by using a 12" twisted pair terminated with a 0.1μf & 47μf capacitor.
   Tolerance: includes set up tolerance, line regulation, load regulation.
   Line regulation is measured from low line to high line at rated load.

- 6. Length of set up time is measured at first cold start. Turning ON/OFF the power supply may lead to increase of the set up time.
- 7. Derating may be needed under low input voltages. Pleas check the derating curve for more details.

  8. The ambient temperature derating of 3.5°C/ 1000m is needed for operating altitude greater than 2000m(6500ft).
- 9. Optional for 1.5KVAC with BF rated.
- 10. The power supply is considered as an independent unit, but the final equipment still need to re-confirm that the whole system complies with the EMC directives. For guidance on how to perform these EMC tests, please refer to "EMI testing of component power supplies." (as available on http://www.meanwell.com)

### **■** DC output plug

#### O Standard plug: R7B

# Optional DC plug:

| Min. DIN 3 Pin with Lock (male)       | Type No. | Pin Assignment |            |
|---------------------------------------|----------|----------------|------------|
| Will. Bill 31 ill with Lock (male)    | туре но. | PIN No.        | Output     |
|                                       | R6B      | 1              | +Vo        |
