

## General Description

The AOZ8621UNI is a series of 1-channel unidirectional high surge transient voltage suppressors designed to protect power rails such as battery and VBUS from damaging ESD or surge events. The VRWM range is from 5V to 22V.

This device consists a unidirectional TVS diode in a single package. During transient events, the diode directs the transient to either the positive side of the power supply line or to ground.

The AOZ8621UNI provides low clamping voltage making it ideally suited for power rail protection in mobile and computing devices.

The AOZ8621UNI comes in a RoHS compliant and Halogen Free 2mm×2mm×0.55mm package and is rated for -40°C to +125°C junction temperature range.
