Description

AD62550A is a single chip of Class-D audio amplifier with USB/I²S interface. When using the power supplied from the USB port, AD62550A can drive a pair of up to 1W speakers due to the built-in, high efficiency and high performance class D amplifiers. The device also has an I²S input port and I²S output port. The I²S input port allows other external audio sources to use the class D amplifier to share the speakers. The I²S output port allows other high performance audio device (i.e. AD8356A/AD8256A) to be controlled by AD62550A.
