

Cooper-Wheelock Series E50

by Honeywell

Description

Series E50 Speakers provide high audio output with clear audibility and are designed to meet the critical needs of the life safety industry for effective emergency voice communications and tone signaling. In addition, the strobes provide visible signaling to alert the hearing impaired.

The Cooper-Wheelock Series E50 Speakers feature high efficiency sound output, with dual voltage (25/70 VRMS) capability and field selectable taps from 1/8 to 2 watts. They are designed to provide a sleek, aesthetic appearance for emergency voice/alarm communications systems. All Series E50 models mount on standard 4" x 2-1/8" (10.2 x 5.5 cm) electrical boxes (with no extension ring required) and incorporate a speaker mounting plate for faster installation. The grille cover snaps on, so no mounting screws are visible. Attractive surface boxes are also available for surface installations.

The Series E50 Speaker Strobes use Cooper-Wheelock low current draw Series RSS strobes for wall-mounted applications. Strobe options include patented MCW multi-candela strobes with field selectable candela settings of 15/30/75/110 cd or high intensity MCWH strobes with field selectable 135/185 candela. Models with 15/75 candela (75 cd on axis) are also offered.

The strobe portion of all Series E Speaker Strobes may be synchronized when used in conjunction with the Cooper-Wheelock SM-12/24-R and/or DSM-12/24-R sync modules. Cooper-Wheelock synchronized strobes offer an easy way to comply with ADA and NFPA regulations concerning photosensitive epilepsy.

Series E50 Speaker Strobes are UL Listed for indoor use under Standard 1971 (Signaling Devices for the Hearing-Impaired) and Standard 1480 (Speaker Appliances). All inputs employ IN/OUT wiring terminals for fast installation using 12 to 18 AWG wiring and are compatible with FACP line supervision. Color options for the Series E50 Speakers and Speaker Strobes are red or off-white.

Lexan® is a registered trademark of GE Plastics, a subsidiary of General Electric Company.

Series E50 Speakers and Speaker Strobes

E50 Speaker Strobe

E50 Speaker

Features

- Meets UL Standards 1971 and 1480 (model dependent).
- ADA/NFPA/ANSI compliant.
- Complies with OSHA 29 Part 1910.165.
- Wall mount speaker strobe models with field selectable candela settings of 15/30/75/110cd or 135/185cd (Multi-candela models) or 15/75cd (single candela model).
- Field selectable taps for 25 or 70 VRMS operation from 1/8 watt up to 2 watts.
- High efficiency design for maximum output at minimum wattage across a frequency range of 400 to 4000 Hz.
- 24 VDC strobes produce 1 flash per second with wide UL "Regulated Voltage" of 16 to 33 volts using filtered DC or unfiltered VRMS input voltage.
- Synchronize with the Cooper-Wheelock SM and DSM.
- Mount to 4" square x 2-1/8" (10.2 x 5.5 cm) deep backbox with no extension ring required.
- Snap on grille cover with no visible mounting screws.
- Fast installation with IN/OUT screw terminals using 12 to 18 AWG wires.

NOTE: All CAUTIONS and WARNINGS are identified by the WARNING symbol. All warnings are printed in bold capital letters.

WARNING: PLEASE READ THESE SPECIFICATIONS AND ASSOCIATED INSTALLATION INSTRUCTIONS CAREFULLY BEFORE USING, SPECIFYING OR APPLYING THIS PRODUCT. VISIT WWW.COOPERWHEELLOCK.COM OR CONTACT COOPER-WHEELLOCK FOR THE CURRENT INSTALLATION INSTRUCTIONS. FAILURE TO COMPLY WITH ANY OF THESE INSTRUCTIONS, CAUTIONS OR WARNINGS COULD RESULT IN IMPROPER APPLICATION, INSTALLATION AND/OR OPERATION OF THESE PRODUCTS IN AN EMERGENCY SITUATION, WHICH COULD RESULT IN PROPERTY DAMAGE, AND SERIOUS INJURY OR DEATH TO YOU AND/OR OTHERS.

General Notes:

- Strobes are designed to flash at 1 flash per second minimum over their "Regulated Voltage Range".
Note that NFPA-72 specifies a flash rate of 1 to 2 flashes per second and ADA Guidelines specify a flash rate of 1 to 3 flashes per second.
- All candela ratings represent minimum effective Strobe intensity based on UL Standard 1971.
- Series NS Strobe products are listed under UL Standard 1971 for indoor use with a temperature range of 32°F to 120°F (0°C to 49°C) and max. humidity of 93% (± 2%).
- "Regulated Voltage Range" is the newest terminology used by UL to identify the voltage range. Prior to this change, UL used the terminology "Listed Voltage Range".

Table 1: Average RMS Current

E50 Speaker Strobes	E50 Strobe Current - Wall Mount						
	241575W	24MCW				24MCWH	
	15/75cd	15cd	30cd	75cd	110cd	135cd	185cd
24 vdc	0.060	0.041	0.063	0.109	0.140	0.195	0.270
UL max*	0.090	0.060	0.092	0.165	0.220	0.300	0.420

* RMS current ratings are per UL average RMS method. UL max current rating is the maximum RMS current within the listed voltage range (16-33v for 24v units). For strobes the UL max current is usually at the minimum listed voltage (16v for 24v units). For unfiltered FWR ratings, see installation instructions.

Table 2: E50 UL Reverberant dBA @ 10 Feet**

watts	1/8	1/4	1/2	1	2
E50 Speaker	77	79.5	82.5	85	88
E50 Speaker Strobe	77	79.5	82.5	85	88

**dBA ratings are based on UL testing under UL Standard 1480.

Architect and Engineer Specifications

The speaker appliances shall be Cooper-Wheelock Series E50 Speakers and the speaker strobe appliances shall be Cooper-Wheelock Series E50 Speaker Strobes or approved equals. The speakers shall be UL Listed under Standard 1480 for Fire Protective Service and speakers equipped with strobes shall be listed under UL Standard 1971 for Emergency Devices for the Hearing-Impaired. In addition, the strobes shall be certified to meet the requirements of FCC Part 15, Class B.

All speakers shall be designed for a field selectable input of either 25 or 70 VRMS, with selectable power taps from 1/8 watt to 2 watts. All models shall have listed sound output of up to 89 dBA at 10 feet and a listed frequency response of 400 to 4000 Hz. The speaker shall incorporate a sealed back construction. All inputs shall employ terminals that accept 12 to 18 AWG wire sizes. The strobe portion of the appliance shall produce a flash rate of one (1) flash per second over the regulated voltage range and shall be of low current design. Where Multi Candela Speaker Strobes are specified, the strobe intensity shall have field selectable settings and shall be rated per UL Standard 1971 at 15/30/75/110cd or 135/185cd for wall mounting. The selector switch for selecting the candela shall be tamper resistant. The 15/75 candela strobe shall be specified when 15 candela UL Standard 1971 Listing with 75 candela -on-axis is required.

When synchronization is required, the strobe portion of the appliance shall be compatible with the Cooper-Wheelock's SM-12/24-R and/or DSM-12/24-R modules. The strobes shall not drift out of synchronization at any time during operation. If the sync modules or power supply fails to operate, (i.e., contacts remain closed), the strobe shall revert to a non-synchronized flash rate.

The speaker and speaker strobe appliances shall be designed for indoor flush mounting to 4" x 2-1/8" (10.2 x 5.5.cm) electrical boxes without need for an extension ring or surface mounting to Cooper-Wheelock's E50SB or E50SSB surface boxes. The speaker and speaker strobe shall incorporate a speaker mounting plate with a snap-on grille cover. The finish of the Series E50 speakers and speakers strobes shall be white or red.
