## Notes:

1. R<sub>θJA</sub> is the sum of the junction-to-case and case-to-ambient thermal resistance where the case thermal reference is defined as the solder mounting surface of the drain pins. R<sub>θJC</sub> is guaranteed by design while R<sub>θCA</sub> is determined by the user's board design.

a) R<sub>θJA</sub> = 40°C/W when mounted on a 1 in<sup>2</sup> pad of 2oz copper.

b) R<sub>θJA</sub> = 96°C/W on a minimum mounting pad.
