

**FM/AM STEREO RADIORECEIVER**
**KKA1238NS**
**DESCRIPTION**

KKA1238NS is a high performance one - chip bipolar ICS designed for FM/AM stereo radios. These include an FM/AM front end, FM/AM IF amplifier, FM/AM detection output and FM stereo demodulator output. Bipolar silicon monolithic IC.

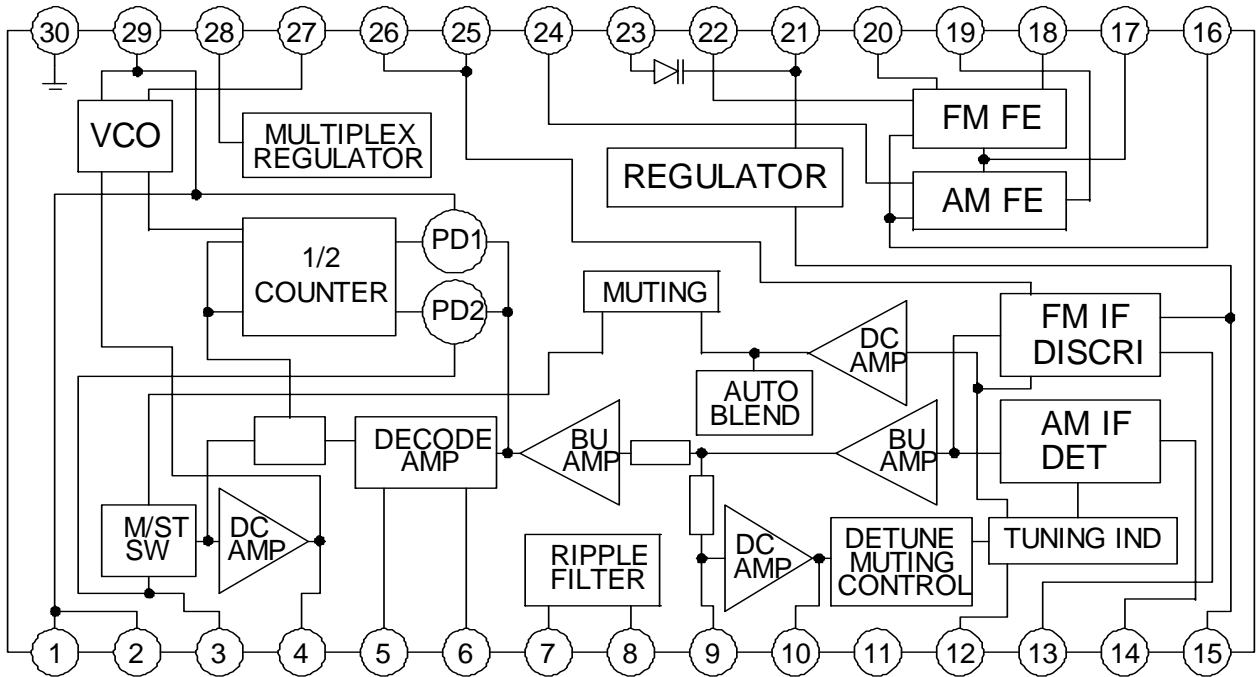

**FEATURES**

- Low current consumption  
(In FM mode  $I_D = 11.0$  mA, in AM mode 8.5 mA,  $V_{CC} = 6.0V$ ).
- Built - in LED drive circuit for tuning.
- Built - in LED drive circuit for stereo indicator.
- Built - in detune muting circuit for the FM band.
- Few external parts.
