

Rev. V3

#### **Features**

- Operates 925 to 960 MHz
- Low Amplitude Ripple
- Linear Phase
- 50 Ohm Nominal Impedance
- Continuously Variable Across a Full 360 degree range
- Test Boards Available
- 4x6 mm PQFN Package

## **Description**

M/A-COM's MAMDCC0005 is a Vector Modulator that significantly reduces the required board space compared to hybrid solutions. The monolithic passive elements will lead to greater repeatability lot-tolot. Low amplitude ripple will provide superior performance. High intercept and compression points will contribute to more linear system performance. MAMDCC0005 is ideally suited for wireless infrastructure applications.

M/A-COM's MADRCC0002 Dual Linearizer is designed to simplify the control of Vector Modulators. See Figure 1 and App Note AN3001.

## **Ordering Information**

Part Number	Package
MAMDCC0005	Bulk Packaging
MAMDCC0005TR	1000 piece reel
MAMDCC0005-DC000	Sample Test Board

Note: Reference Application Note M513 for reel size information.

Commitment to produce in volume is not guaranteed.

- 2. Exceeding any one or combination of these limits may cause permanent damage to this device.
- 3. M/A-COM does not recommend sustained operation near these survivability limits.
- 4. Note that external dropping resistors are required to limit the current and voltage on the PIN diodes.

#### **Handling Procedures**

Please observe the following precautions to avoid damage:

## **Static Sensitivity**

Gallium Arsenide Integrated Circuits are sensitive to electrostatic discharge (ESD) and can be damaged by static electricity. Proper ESD control techniques should be used when handling these devices.

### **Moisture Sensitivity**

The MSL rating for this part is defined as Level 2 per IPC/JEDEC J-STD-020. Parts shall be stored and/or baked as required for MSL Level 2 parts.
