## **Handling and Safety Precautions**

Anti-static protection, such as ionized air blowers or grounded wrist straps with a 1 mega series resistor, should be used at all times when handling laser diode. In addition, soldering irons should be well grounded.

Overheating caused by soldering of the leads of a laser diode must be prevented. Recommend soldering iron temperature and maximum exposure time are below 260 °C and 10 seconds.

### **Description**

The MCE-8V4C-302 is a high performance, near infrared 850 nm Vertical Cavity Surface Emitting Laser (VCSEL) that offers high coupling powers in fiber optic transmission applications. This product is designed to meet the needs of high speed data communications and other applications.

The MCE-8V4C-302 is compatible with industry standard wave or hand solder processes.
