## DESCRIPTION

The cPCI-A-3U-300C is a high-reliability, 300W, continuous power, 3Ux8HP CompactPCITM power supply developed for chassis' with airflows as low as 250lfm. The use of 2 converters operating in parallel for the 3.3 V and the 5 V outputs enables maximum current draw on the two outputs simultaneously. Compliant with the PICMG 2.11 standard.
With a widerange input of $90-264 \mathrm{VAC}$, safety agency approvals to UL60950 and EN60950, EMI compliance to Class B FCC and EN55022 standards, the cPCI-A-3U-300C was designed with globally-deployed systems in mind. Additional features include remote sense compensation, unit enable control (EN\#), output inhibit control (INH\#), output fault signal (FAL\#), and thermal warning signal (DEG\#). LEDs are provided for visual indication of input power presence and output fault condition.

| Hot-Swap Capability | Protected by internal ORing diodes |  |  |  |  |
| Output Fault Isolation | Output isolation devices are present in all outputs to isolate faults within a failed power supply. |  |  |  |  |
| Thermal Shutdown | Automatic recovery upon restoration to operational temperatures |  |  |  |  |

| STATUS \& CONTROL SIGNALS \& INDICATORS |  |
| :--- | :--- |
| Name | Description |
| Enable (EN\#) | Short pin on connector will enable the outputs when the mating pin is grounded. Supply will not power up until this pin is engaged <br> to its mate in the backplane. Unit output will be inhibited as pin is disengaged from the mating connector. |
| Output Inhibit (INH\#) | Secondary referenced; active low, TTL compatible. Logic "0" or short circuit to output return inhibits all outputs. |
| Output Fault (FAL\#) | Secondary referenced; TTL compatible. Logic "0" denotes that one of the output voltages has fallen below the lower regulation limit. |
| Remote Sense (RS+, RS-) | Connection of the sense leads across the load at the desired point of regulation will compensate for voltage distribution drops up to 200mV <br> between the output terminals of the power supply and the point of connection. |
| Thermal Warning (DEG\#) | Secondary referenced; TTL compatible. Logic " 0 " denotes a thermal warning; nominally, $10^{\circ} \mathrm{C}$ prior to thermal shutdown. |
| Power Present Indicator LED | A single bi-color Indicator LED |
|  | Green LED - indicates output in range |
|  | Red LED - indicates one or more outputs below $10 \%$ of specified range. |

| ROHS COMPLIANCE INFORMATION |
| :--- | :--- |
| This series is compatible with RoHS soldering |
| systems with a peak wave solder temperature |
| of $300^{\circ} \mathrm{C}$ for 10 seconds. The pin termination |
| finish on this product series is Tin Plate, Hot |
| Dipped over Matte Tin with Nickel Preplate. |
| The series is backward compatible with Sn/Pb |
| soldering systems. |
