**DC-DC Converters** 

# **DDR12 SERIES**

[ 2 YEAR WARRANTY ]

High current dual-output power module for DDR memory

Single compact module provides 25 A @ 2.5 V for V<sub>ddq</sub> supply and 8 A @ 1.25 V for V<sub>tt</sub> termination

- Tracking dual output voltages (1.25 V @ 8 A, 2.5 V @ 25 A)
- Output voltage remote sense

Sink capability for logic terminations

Power good output signal

**Overvoltage protection** 

Dual output

**Overcurrent protection** 

**Remote ON/OFF** 

Available RoHS compliant

The dual output DDR12-25D08-AJ is specifically designed to meet the power needs of double data rate memory DIMMS and associated memory control logic. The  $V_{tt}$  output tracks the  $V_{ddq}$  output, while the  $V_{tt}$  output can sink current as required by logic terminations.This converter offers typical efficiencies greater than 84% when operated at 50% load or greater. This model features a wide input range as well as trimmable output voltages. Remote sense on V<sub>ddq</sub> and remote ON/OFF facilities are included as standard, and the converter is protected against overcurrent and over-voltage conditions.

**DC-DC Converters** 

Stresses in excess of the maximum ratings can cause permanent damage to the device. Operation of the device is not implied at these or any other conditions in excess of those given in the specification. Exposure to absolute maximum ratings can adversely affect device reliability.

#### Absolute Maximum Ratings

Characteristic	Symbol	Min	Тур	Max	Units	Notes and Conditions
Input voltage - continuous	V <sub>in</sub> (cont)	-0.3		13.2	Vdc	V <sub>in(+)</sub> - V <sub>in(-)</sub>
Input voltage - nominal	V <sub>in</sub> (nom)		12			
Operating temperature	Т <sub>ор</sub>	0		80	°C	Refer to derating guidelines and Note 1
Storage temperature	T <sub>storage</sub>	-40		125	°C	
Output current	I <sub>ddq</sub> (max) I <sub>tt</sub> (max)			25 8	A A	

All specifications are typical at V<sub>in</sub>(nom), V<sub>ddq</sub> = 2.5 V, V<sub>tt</sub> = 1.25 V and full load. Tests were performed at 25 °C unless otherwise stated.

#### Input Characteristics Characteristic Symbol Min Мах Units **Notes and Conditions** Тур V<sub>in</sub> (oper) 12 13.2 Input voltage - operating 10.8 Vdc Input current - min. load 400 mAdc V<sub>in</sub> (min) - V<sub>in</sub> (max), enabled lin I<sub>in</sub> (off) 20 Converter disabled Input current - Quiescent mAdc

#### Turn On/Off

Characteristic	Symbol	Min	Тур	Max	Units	Notes and Conditions
Input voltage - turn on	V <sub>in</sub> (on)	10	10.2	10.4	Vdc	
Input voltage - turn off	V <sub>in</sub> (off)	9.7	9.9	10.1	Vdc	
Turn on delay - enabled,	T <sub>delay</sub>		5		ms	With the enable signal asserted,
then power applied	(power)					this is the time from when the
						input voltage reaches the
						minimum specified operating
						voltage until the POWER GOOD
						is asserted high
Turn on delay - power	T <sub>delay</sub>		5		ms	$V_{in} = V_{in}$ (nom), then enabled.
applied, then enabled	(enable)					This is the time taken until the
						POWER GOOD is asserted
	_					high
Output to POWER GOOD delay	T <sub>delay</sub>		3		ms	Output voltage in full regulation to POWER GOOD asserted high
Rise time	T <sub>rise</sub>		2		ms	

**DC-DC** Converters

Characteristic - Signal Name	Symbol	Min	Тур	Max	Units	Notes and Conditions
At remote/control ON/OFF pin Open collector or equivalent compatible						See Notes 2 and 3 See Application Note 133 for Remote ON/OFF details
High level input voltage	v <sub>ih</sub>	2.0			V	Converter guaranteed on wher OUTEN pin is greater than V <sub>ih</sub> (max)
Low level input voltage	v <sub>il</sub>			0.80	V	Converter guaranteed off when OUTEN pin is less than V <sub>il</sub> (max)
Low level input current	I <sub>il</sub> (max)		1		mA	$V_{il} = 0.0 V$

## **Reliability and Service Life**

Characteristic	Symbol	Min	Тур	Max	Units	Notes and Conditions
Mean time between failure	MTBF	TBD			Hours	Telcordia SR-332

Other Specifications

other specifications						
Characteristic	Symbol	Min	Тур	Max	Units	Notes and Conditions
Switching frequency	F <sub>sw</sub>		300		kHz	Fixed frequency
Weight			34		g	

#### **Referenced ETSI standards:**

ETS 300 019: Environmental conditions and environmental tests for telecommunications equipment

ETS 300 019: Part 1-3 (1997) Classification of environmental conditions stationary use at weather protected locations ETS 300 019: Part 2-3 (1997) Specification of environmental tests stationary use at weather protected locations

#### EMC

**Electromagnetic Compatibility** 

Phenomenon	Port	Standard	Test level	Criteria	Notes and conditions
Immunity:					
ESD	Enclosure	EN61000-4-2	6 kV contact 8 kV air		As per ETS 300 386-1 table 5

#### Performance criteria:

NP: Normal Performance: EUT shall withstand applied test and operate within relevant limits as specified without damage. RP: Reduced Performance: EUT shall withstand applied test. Reduced performance is permitted within specified limits, resumption to normal performance shall occur at the cessation of the test.

LFS: Loss of Function (self recovery): EUT shall withstand applied test without damage, temporary loss of function permitted during test. Unit will self recover to normal performance after test.

#### **Referenced ETSI standards:**

ETS 300 386-1 table 5 (1997): Public telecommunication network equipment, EMC requirements

ETS 300 132-2 (1996): Power supply interface at the input to telecommunication equipment: Part 2 operated by direct current (dc) ETR 283 (1997): Transient voltages at interface A on telecommunication direct current (dc) power distributions

Material Ratings	
Characteristic - Signal Name	Notes and Conditions
Flammability rating	UL94V-0
Material type	FR4 PCB

### **DC-DC Converters**

#### Note 1

For maximum reliability temperature at the Thermal Reference Point, shown in Figure 11, should not exceed 100 °C.

#### Note 2

The control pin is referenced to Vin-

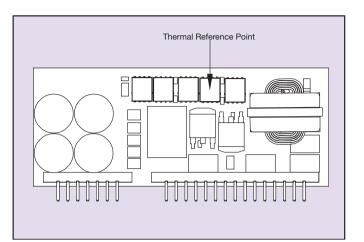

#### Note 3

The DDR12 is supplied as standard with active High logic. Control input pulled low: Unit Disabled Control input left open: Unit Enabled

### Note 4

Thermal reference set up: Unit mounted on an edge card test board 215 mm x 115 mm. Test board mounted vertically. For test details and recommended set-up see Application Note 133.

**CAUTION:** Hazardous internal voltages and high temperatures. Ensure that unit is accessible only to trained personnel. The user must provide the recommended fusing in order to comply with safety approvals.
