SP8402

September 2005

Very Low Phase Noise Divider by 2^N

The SP8402 is a very low phase noise divider which divides by powers of two. The S0, S1, S2 data inputs select the division ratio in the range 2¹ to 2⁸. Special circuits techniques have been used to reduce the phase noise considerably below that produced by standard dividers. The data inputs are CMOS or TTL compatible.

The SP8402 is packaged in a 28 pin plastic SO package to be compatible with the SP8400 and SP8401 devices.

FEATURES

- Very low Phase Noise (Typically -155 to 160dBc/Hz at 1kHz offset)
- Supply Voltage 5V

ABSOLUTE MAXIMUM RATINGS

Supply Voltage	6.5V
Output Current	20mA
Storage Temperature Range	-55°C to +125°C
Maximum Clock Input Voltage	2.5V p-p
