DATA SHEET

An ON Semiconductor Company

LV0229XA — Monolithic Linear IC For Optical Pickups Front Monitor OE-IC

Overview

The LV0229XA is a front monitor optoelectronic IC for optical pickups that has a built-in photo diode compatible with three waveforms. LV0229XA is small size and type CSP packages.

Functions

- Pin photodiode compatible with three wavelengths incorporated.
- Gain adjustment (-5dB to +5dB in 256 steps) through serial communication.
- Amplifier to amplify differential output.

Features

- Photodiode compatible with three wavelengths incorporated, high-speed process employed.
- Compact, thin CSP package employed.
- Use AR coated glass for three-wavelength (One side).

Specifications

Absolute Maximum Ratings at $T_a = 25^\circ\text{C}$

| Parameter | Symbol | Conditions | Ratings | Unit |
|-----------------------------|-----------|--|-------------|------------------|
| Maximum supply voltage | V_{CC} | | 6 | V |
| Allowable power dissipation | P_d | substrate *1, $T_a = 75^\circ\text{C}$ | 105 | mW |
| Operating temperature | T_{opr} | | -20 to +75 | $^\circ\text{C}$ |
| Storage temperature | T_{stg} | | -40 to +100 | $^\circ\text{C}$ |

*1: Glass epoxy both-side substrate 55mm × 45mm × 1mm, Copper foil area (head: about 85% tail: about 70%)

■ Any and all SANYO Semiconductor Co.,Ltd. products described or contained herein are, with regard to "standard application", intended for the use as general electronics equipment. The products mentioned herein shall not be intended for use for any "special application" (medical equipment whose purpose is to sustain life, aerospace instrument, nuclear control device, burning appliances, transportation machine, traffic signal system, safety equipment etc.) that shall require extremely high level of reliability and can directly threaten human lives in case of failure or malfunction of the product or may cause harm to human bodies, nor shall they grant any guarantee thereof. If you should intend to use our products for new introduction or other application different from current conditions on the usage of automotive device, communication device, office equipment, industrial equipment etc. , please consult with us about usage condition (temperature, operation time etc.) prior to the intended use. If there is no consultation or inquiry before the intended use, our customer shall be solely responsible for the use.

■ Specifications of any and all SANYO Semiconductor Co.,Ltd. products described or contained herein stipulate the performance, characteristics, and functions of the described products in the independent state, and are not guarantees of the performance, characteristics, and functions of the described products as mounted in the customer's products or equipment. To verify symptoms and states that cannot be evaluated in an independent device, the customer should always evaluate and test devices mounted in the customer's products or equipment.

SANYO Semiconductor Co., Ltd.

| | FcB2 | -3dB (1MHz reference), λ = 405nm Light input = 40μW (DC) + 20μW (AC) | High | 50 | 70 | | | |
| Settling time *1 | T _{set} | | | | 10 | 15 | ns | |
| Response time *1 | T _r , T _f | V _o = 0.9V _{p-p} , output level 10 to 90% f _c = 10MHz, duty = 50% | | | | 4 | 10 | ns |
| Linearity *1 | Lin | At output voltage 0.5V and 1.0V (Between VOP-VON) | | -1 | 0 | 1 | % | |
| Light-output voltage temperature dependence Voltage between VOP-VON *1, *3 | TC | λ = 780nm, 25°C reference | | 4 | 7 | 10 | % | |
| | TD | λ = 650nm, 25°C reference | | -3 | 0 | 3 | % | |
| | TB | λ = 405nm, 25°C reference | | -4 | -1 | 2 | % | |

Item with *1 mark indicate the design reference value.

Item with *2 mark indicate the frequency characteristics when VOP and VON are applied individually.

The frequency characteristics are for the output voltage adjustment range is -5 to +5dB.

Item with *3 mark indicates the temperature dependence for the case of High / Middle / Low gain and for the case when the temperature is 25 to 75°C for the output voltage adjustment range of -5 to +5dB.

[Expression of output voltage]

$$V_n = (\text{sensitivity} / 1.78) \times 5221 / (5221 - 14 \times \text{GCAstep}) \times \text{light intensity } (\mu\text{W})$$

Pin Assignment

| Pin No. | Pin name | Function |
|---------|----------|--------------------------------------|
| A1 | SCLK | Serial communication Clock pin |
| A3 | SEN | Serial communication Enable pin |
| A5 | VCC | Power supply voltage pin |
| B2 | SSEL | Register selection pin |
| | | SSEL = Low : Address 00 to 0Fh used |
| | | SSEL = High : Address 10 to 1Fh used |
| | | SSEL = Open : Address 70 to 7Fh used |
| B4 | VOP | Positive side output pin |
| C1 | SDIO | Serial communication Data pin |
| C3 | GND | GND pin |
| C5 | VON | Negative side output pin |

| Value | | 11: Power on 00/01/10: Sleep | | 00/01: High 10: Middle 11: Low | | | | | |
| Name | 71h | GAIN | | | | | | | |
| Default | | 1 | 1 | 1 | 1 | 1 | 1 | 1 | 1 |
| Value | | 00000000 to 11111111 | | | | | | | |
| Name | 7Eh | TEST1 (*1) | | | | | | | |

*1 TEST1 are either the time when power is applied or "00000000" is set. Do not attempt to change "00000000" during operation.

"00000000" is returned when reading is made.

*2 No problem in terms of operation occurs even when writing is made to the address 02h to 0Dh & 0Fh, 12h to 1Dh & 1Fh and 72h to 7Dh & 7Fh.

"00000000" is returned when this address is read.

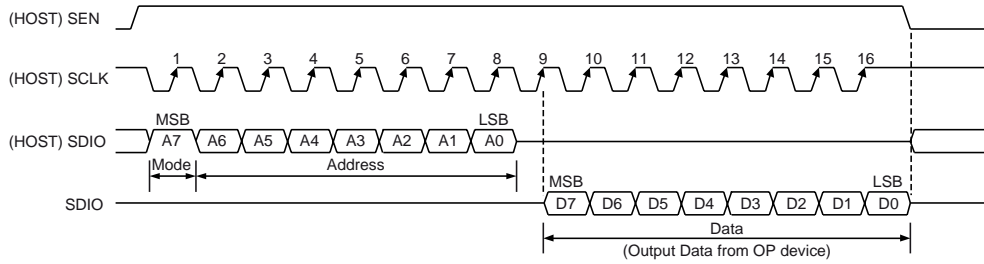

*3 When I performed address reading except the register group set by an SSEL terminal, I keep Hi-Z without paying a value.

- SANYO Semiconductor Co.,Ltd. assumes no responsibility for equipment failures that result from using products at values that exceed, even momentarily, rated values (such as maximum ratings, operating condition ranges, or other parameters) listed in products specifications of any and all SANYO Semiconductor Co.,Ltd. products described or contained herein.
- Regarding monolithic semiconductors, if you should intend to use this IC continuously under high temperature, high current, high voltage, or drastic temperature change, even if it is used within the range of absolute maximum ratings or operating conditions, there is a possibility of decrease reliability. Please contact us for a confirmation.
- SANYO Semiconductor Co.,Ltd. strives to supply high-quality high-reliability products, however, any and all semiconductor products fail or malfunction with some probability. It is possible that these probabilistic failures or malfunction could give rise to accidents or events that could endanger human lives, trouble that could give rise to smoke or fire, or accidents that could cause damage to other property. When designing equipment, adopt safety measures so that these kinds of accidents or events cannot occur. Such measures include but are not limited to protective circuits and error prevention circuits for safe design, redundant design, and structural design.
- In the event that any or all SANYO Semiconductor Co.,Ltd. products described or contained herein are controlled under any of applicable local export control laws and regulations, such products may require the export license from the authorities concerned in accordance with the above law.
- No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopying and recording, or any information storage or retrieval system, or otherwise, without the prior written consent of SANYO Semiconductor Co.,Ltd.
- Any and all information described or contained herein are subject to change without notice due to product/technology improvement, etc. When designing equipment, refer to the "Delivery Specification" for the SANYO Semiconductor Co.,Ltd. product that you intend to use.
- Upon using the technical information or products described herein, neither warranty nor license shall be granted with regard to intellectual property rights or any other rights of SANYO Semiconductor Co.,Ltd. or any third party. SANYO Semiconductor Co.,Ltd. shall not be liable for any claim or suits with regard to a third party's intellectual property rights which has resulted from the use of the technical information and products mentioned above.
