

OUTLINE

The Rx5RE Series are CMOS-based voltage regulator ICs with high output voltage accuracy and ultra-low quiescent current. Each of these ICs consists of a voltage reference unit, an error amplifier, a driver transistor, and resistors for setting output voltage, and a current limit circuit. By use of these ICs, a constant voltage power supply circuit with high efficiency can be constructed because the dropout voltage and quiescent current of these ICs are very small. Furthermore, these ICs have a built-in current limit circuit. The output voltage of these ICs is fixed with high accuracy.

Two types of packages, TO-92 and SOT-89 (Mini-power Mold) are available.

FEATURES

- Ultra-low Quiescent CurrentTyp. 1.1 μ A (Rx5RE30A, $V_{IN}=5.0V$)
- Ultra-low Dropout VoltageTyp. 0.5V (Rx5RE50A, $I_{OUT}=60mA$)
- Large Output CurrentTyp. 120mA (Rx5RE50A)
- Low Temperature-Drift Coefficient of Output VoltageTyp. ± 100 ppm/ $^{\circ}C$
- Broad Operating Voltage RangeMax. 10.0V
- Excellent Line RegulationTyp. 0.1%/V
- High Accuracy Output Voltage $\pm 2.5\%$
- Output VoltageStepwise setting with a step of 0.1V in the range of 2.0V to 6.0V is possible (refer to Selection Guide)
- Two Types of PackagesTO-92, SOT-89 (Mini-power Mold)

APPLICATIONS

- Power source for battery-powered equipment.
- Power source for cameras, video instruments such as camcorders, VCRs, and hand-held communication equipment.
- Precision voltage references.

BLOCK DIAGRAM

SELECTION GUIDE

The package type, the output voltage, the packing type, and the taping type of Rx5RE Series can be designated at the user's request by specifying the part number as follows.

Rx5RE $\overbrace{\text{xxxx}}$ - $\overbrace{\text{xx}}$ ← Part Number
 ↑ ↑↑↑ ↑
 a bcd e

Code	Contents
a	Designation of Package Type: E: TO-92 H: SOT-89 (Mini-power Mold)
b	Setting Output Voltage (V _{OUT}): Stepwise setting with a step of 0.1V in the range of 2.0V to 6.0V is possible.
c	A
d	Designation of Packing Type: A: Taping C: Antistatic bag for TO-92 and samples
e	Designation of Taping Type: Ex. TO-92 : RF, RR, TZ SOT-89: T1, T2 (refer to Taping Specifications) "TZ" and "T1" are prescribed as a standard.

For example, the product with Package Type SOT-89, Output Voltage 5.0V, Version A and Taping Type T1 are designated by Part Number RH5RE50AA-T1.

ABSOLUTE MAXIMUM RATINGS

Absolute Maximum ratings are threshold limit values that must not be exceeded even for an instant under any conditions. Moreover, such values for any two items must not be reached simultaneously. Operation above these absolute maximum ratings may cause degradation or permanent damage to the device. These are stress ratings only and do not necessarily imply functional operation below these limits.

TYPICAL APPLICATION

In Rx5RE Series, a constant voltage can be obtained without using capacitors C1 and C2. However, when the wire connected to VIN is long, use capacitor C1. Output noise can be reduced by using capacitor C2.

Insert capacitors C1 and C2 with the capacitance of 0.1μF to 2.0μF between input/output pins and GND pin with minimum wiring.

APPLICATION CIRCUITS

• VOLTAGE BOOST CIRCUIT

The output voltage can be obtained by the following formula :

$$V_{OUT} = V_{reg}^{*1} \cdot (1 + R2/R1) + I_{SS} \cdot R2$$

Since the quiescent current of Rx5RE Series is so small that the resistances of R1 and R2 can be set as large as several hundreds kΩ and therefore the supply current of “Voltage Boost Circuit” itself can be reduced.

Furthermore, since Rx5RE Series are operated by a constant voltage, the supply current of “Voltage Boost Circuit” is not substantially affected by the input voltage.

*1) Vreg : Set Output Voltage of Rx5RE Series.

• DUAL POWER SUPPLY CIRCUIT

As shown in the circuit diagram, a dual power supply circuit can be constructed by using two Rx5RE Series.

This circuit diagram shows a dual power supply circuit with an output of 3V and an output of 5V. When the minimum output current of IC2 is larger than Iss of IC1, resistor R is unnecessary. Diode D is a protection diode for the case where VOUT2 becomes larger than VOUT1.

• CURRENT BOOST CIRCUIT

Output current of 120mA or more can be obtained by the current boost circuit constructed as shown in this circuit diagram.

• CURRENT BOOST CIRCUIT WITH OVERCURRENT LIMIT CIRCUIT

A circuit for protecting Tr.1 from the destruction caused by output short-circuit or overcurrent is shown in this circuit diagram.

When the voltage reduction caused by the current (I_{OUT}) which flows through R2 reaches V_{be2} of Tr.2 by additionally providing the current boost circuit with Tr.2 and R2, Tr.2 is turned ON and the base current of Tr.1 is increased, so that the output current is limited.

Current limit of Overcurrent Limit Circuit is obtained as follows :

$$I_{OUT} \approx V_{be2}/R2$$

• CURRENT SOURCE

A current source with the structure as shown in this circuit diagram can be used. Output Current I_{OUT} is obtained as follows :

$$I_{OUT} = V_{reg}^{*1}/R + I_{SS}$$

Take care that Output Current I_{OUT} does not exceed its allowable current.

*1) V_{reg} : Set Output Voltage of Rx5RE Series.

• TO-92 (SC-43A)

Unit: mm

PACKAGE DIMENSIONS

TAPING SPECIFICATION

(Note) When taping is performed, the pins of TO-92 are subjected to a particular forming.

(Note) TZ type tape is not in the form of a reel, but is packed in a zigzag state in box. Therefore, the tape can be used as either an RF type tape or an RR type tape, depending upon the pulling out direction (B or F).

TAPING REEL DIMENSIONS (RF, RR)

1. The products and the product specifications described in this document are subject to change or discontinuation of production without notice for reasons such as improvement. Therefore, before deciding to use the products, please refer to Ricoh sales representatives for the latest information thereon.
2. The materials in this document may not be copied or otherwise reproduced in whole or in part without prior written consent of Ricoh.
3. Please be sure to take any necessary formalities under relevant laws or regulations before exporting or otherwise taking out of your country the products or the technical information described herein.
4. The technical information described in this document shows typical characteristics of and example application circuits for the products. The release of such information is not to be construed as a warranty of or a grant of license under Ricoh's or any third party's intellectual property rights or any other rights.
5. The products listed in this document are intended and designed for use as general electronic components in standard applications (office equipment, telecommunication equipment, measuring instruments, consumer electronic products, amusement equipment etc.). Those customers intending to use a product in an application requiring extreme quality and reliability, for example, in a highly specific application where the failure or misoperation of the product could result in human injury or death (aircraft, spacevehicle, nuclear reactor control system, traffic control system, automotive and transportation equipment, combustion equipment, safety devices, life support system etc.) should first contact us.
6. We are making our continuous effort to improve the quality and reliability of our products, but semiconductor products are likely to fail with certain probability. In order to prevent any injury to persons or damages to property resulting from such failure, customers should be careful enough to incorporate safety measures in their design, such as redundancy feature, firecontainment feature and fail-safe feature. We do not assume any liability or responsibility for any loss or damage arising from misuse or inappropriate use of the products.
7. Anti-radiation design is not implemented in the products described in this document.
8. Please contact Ricoh sales representatives should you have any questions or comments concerning the products or the technical information.

RICOH COMPANY., LTD. Electronic Devices Company

■ Ricoh presented with the Japan Management Quality Award for 1999.
Ricoch continually strives to promote customer satisfaction, and shares the achievements of its management quality improvement program with people and society.

■ Ricoh awarded ISO 14001 certification.
The Ricoh Group was awarded ISO 14001 certification, which is an international standard for environmental management systems, at both its domestic and overseas production facilities. Our current aim is to obtain ISO 14001 certification for all of our business offices.
