Assembled Cables
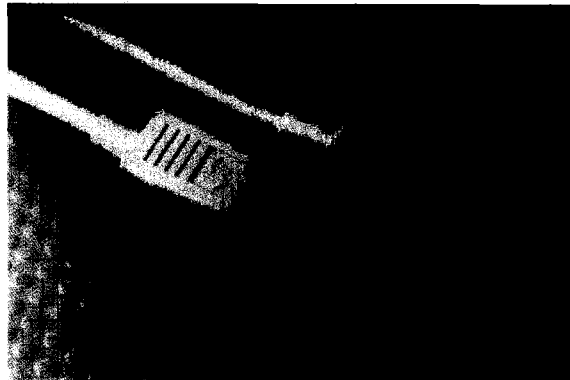

Choose from standard preassembled cables or specify your own custom cable assembly. Cable mounted plugs mat with the PCB mounted receptacle or with a cable mounted in-line receptacle. Pan offers a unique locking plug utilizing a latch mechanism to eliminate accidental disconnection from a Pan receptacle; simply pull back on the connector body to un-mate.

The Mini-DIN connector has gold flash or up to 30 μ" gold plated contacts and is insertion molded with integral cable strain relief in matching PVC plastic. The free cable end is stripped and tinned, and the whole assembly 100% tested.
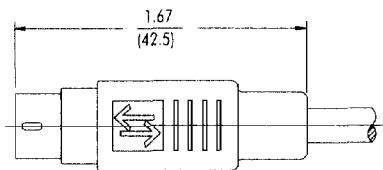

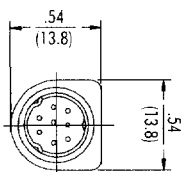

Custom cable assembly options include right angle style connectors.

Just copy the facing page, complete the information requested and fax it to us. We will fax back a quotation for your approval.
