TRIAD MAGNETICS

FS20-120

Description:
The FS20-120 is a dual primary and dual secondary, split bobbin design which operates with either a parallel input of 115V or a series input of 230V. The output voltage will be either 20.0V with a center-tap under a 0.12A load with the secondaries wired in series, or 10.0V under a 0.24A load with the secondaries wired in parallel. The split bobbin design eliminates the need for costly electrostatic shielding.

Electrical Specifications (@25C)
1. Maximum Power: 2.5VA
2. Primary: Series: 230V; Parallel: 115V
3. Secondary: Series: 20.0V CT@ 0.12A; Parallel: 10.0V @ 0.24A
4. Voltage Regulation: 25% TYP @ full load to no load
5. Temperature Rise: 25C TYP
6. Hipot tested 100% at 2500 VRMS

Construction:
Three flange bobbin construction with primaries and secondaries wound side by side for low capacitive coupling.

Agency File:
UL: File E53148, UL 5085-2 (506), Class B General Purpose Transformer,
cUL: File E53148, UL 5085-2 (506), Class B General Purpose Transformer, Canadian Use (CSA 22.2, No.66.2-06)

This model is also available in Class 2, UL 5085-3 (1585) version as FS20-120-C2

Dimensions: Units in inches.

| H	W	L	A	B	C	D	E	F
1.187	1.125	1.375	0.250	0.250	1.200	0.041	0.020	0.234

Weight: 0.25 lbs

Board Layout

RoHS Compliance: As of manufacturing date February 2005, all standard products meet the requirements of 2011/65/EU, known as the RoHS initiative.

As of April 7, 2008, UL standards 506 and 1585 will be migrated to UL 5085-2 and 5085-3, respectively.
