

# Ultrastar® He<sup>6</sup>

# Key Advantages/Highlights

- · World's first helium-filled hard drive
- Industry-first 6TB capacity<sup>1</sup> in a standard 3.5-inch form factor
- HelioSeal® process and 7Stac™ design are keys to hermetically sealed drive with higher capacity
- TCOptimized<sup>™</sup> design delivers on key elements of data center TCO: capacity, power, cooling and storage density
- SAS & SATA 6Gb/s models for configuration flexibility
- Self-Encrypting Drive (SED) options for HDD-level data security

## Applications/Environments

- · High-density data centers
- · Massive scale-out data centers
- · Containerized data centers
- Nearline storage applications
- Bulk storage
- Enterprise and data center applications where density and capacity are paramount

# Innovation for Next-generation, High-density Data Centers

HGST delivers the world's first hermetically sealed, helium hard drive, the Ultrastar® He<sup>6</sup> for massive scale-out environments. Why does helium make a difference? Helium has only one-seventh the density of air. Replacing air with helium inside a hard drive dramatically reduces the turbulence caused by the spinning disks, cuts power consumption and results in a lower temperature within the disk drive.

The reduction in turbulence for the spinning disk allows HGST to deliver a seven-disk design in a traditional 3.5-inch form factor. In addition to being the world's first helium-filled hard drive. HGST Ultrastar He<sup>6</sup> is also the first hard drive in the industry to offer a 6-terabyte capacity. This design provides a 50% capacity gain and still reduces the energy needed to run the drive by up to 23%.

#### TCOptimized™ - Driving Down Data Center TCO with Helium

The amount of data that companies need to store is growing exponentially, but IT budgets remain flat. With 6TB, a low 5.3 idle watts, a reduced weight of 640g, and running at 4-5°C cooler, the new Ultrastar He<sup>6</sup> lowers data center total cost of ownership (TCO) on virtually every level. Key TCO benefits when compared to a typical 3.5-inch, five-platter, air-filled 4TB drive\* include:

MORE CAPACITY

LOWER IDLE POWER\*

### Technology Innovations Make it **Happen**

Through HGST's innovative and patented HelioSeal process, the Ultrastar He<sup>6</sup> drive is the industry's first hermetically sealed helium-filled HDD that can be cost-effectively manufactured in high volume. This unique sealed-drive platform provides a path for higher capacity storage for decades to come while significantly lowering customer total cost of ownership (TCO). The inherent benefits of helium enable HGST's new 7Stac disk design with 6TB, making it the world's highest capacity HDD with the best TCO for cloud storage, massive scale-out environments, disk-to-disk backup, and replicated or RAID environments.

#### ■■ HGST Quality and Service

HGST's Ultrastar He<sup>6</sup> extends the company's long-standing tradition of performance and capacity leadership. The proven drive design enables high reliability and availability to customer data. Ultrastar quality, performance and world class technical support and service provides customers with a lower total cost of ownership over previous generations.

HGST drives are backed by an array of technical support and services, which may include customer and integration assistance. HGST is dedicated to providing a complete portfolio of HDD/ SSD solutions to satisfy today's monumental computing needs.

BETTER WATTS/TB\*

### Features & Benefits

	Feature / Function	Benefits
Capacity	• 6TB	Highest enterprise capacity hard drive available in an industry-standard 3.5-inch form factor
TCO	• HelioSeal Platform	<ul> <li>Delivers 50% higher capacity with 23% lower power, 30% quieter, 4°C cooler and 50g lighter weight</li> </ul>
Performance	<ul><li>7200 RPM</li><li>Rotational Vibration Safeguard (RVS)</li></ul>	High performance for business critical applications     Maintains drive performance in high rotational vibration environments and multi-drive systems
Reliability	2.5M hours MTBF² and 0.35% AFR²     Thermal Fly-height Control (TFC) with internal thermal sensor     Head load/unload     SMART command transport	Industry's highest reliability rating for Capacity Enterprise hard drives     Better soft error rate for improved reliability and performance     Protects disk during non-operation     Adaptive error correction
Power	Improved Watts per gigabyte (W/GB)	• 49% lower W/GB than 4TB air-filled drives
Acoustics	• 2.0 Bels (Idle)	• 30% quieter operation than 5-platter, 4TB 3.5-inch air-filled drives
Security	Optional Bulk Data Encryption (SATA) and TCG Enterprise_A (SAS)	s) • Encrypt private data, providing security and easy redeployment

How to read the Ultrastar model number

HUS726060ALA640 = 6TB, SATA 6Gb/s,

64MB buffer H = HGST

U = Ultrastar

S = Standard

72 = 7200 RPM

0 = Full capacity — 6TB

0 = Capacity this model, 60 = 6TB

A = Generation code

L= 26.1mm z-height

A6 = Interface, SATA 6Gb/s, 512n (S6 = SAS 512n)

4 = 64MB buffer

0 = No encryption (1 = encryption)
