

Overview

The three phase filter series is intended to be used in energy conversion inverter systems (e.g. photo voltaic and wind power), between the inverter and the line or in motor drive systems. The filters are optimized for geometry and power loss.

Technical specifications

Rated voltage	520 VAC
Rated frequency	50-60 Hz
Rated current	250 – 2500 A
Leakage current	< 5 mA *)
Rated temperature	50°C
Temperature range	-40°C to +100°C
Climate category	40/100/21
Voltage test	P -> P 2250 VDC (520 VAC) P -> E 3000 VDC (520 VAC)

The FLLD3...PV series is designed according to IEC/EN 60939 and UL 1283.

*) Maximum leakage current under normal operating conditions.
If two phases are interrupted, leakage current can be much higher.
Filters without Y-capacitors have no leakage current.

Part Number	Rated current @ 50°C (A)	Power loss @ 25°C/50Hz (W)	Weight (kg)
FLLD3250AP-I1	250	15	7
FLLD3320AP-I1	320	15	10
FLLD3400AP-I1	400	25	10
FLLD3600AP-I1	600	40	11
FLLD3800AP-I1	800	50	17
FLLD31K0AP-I1	1000	75	17
FLLD31K6AP-I1	1600	130	26
FLLD32K5AP-I1	2500	230	55

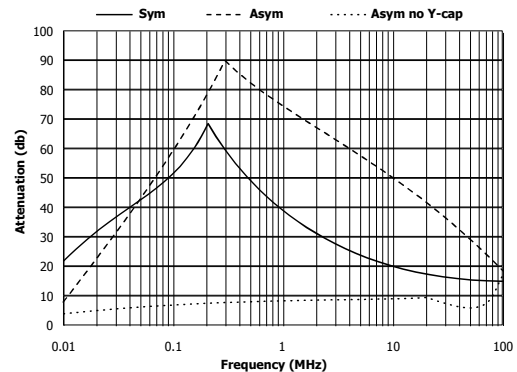

V = 520VAC
X = 520VAC without Y-capacitors

Typical insertion loss

250 to 1000 A

1600 and 2500 A

Mechanical dimensions

Part Number	Dimensions in mm														
	L	W	H	L1	W1	W2	U	X	Y	Z	I	J	K	N	M

Legal disclaimer notice

All product specifications, statements, information and data (collectively, the "information") are subject to change without notice.

All information given herein is believed to be accurate and reliable, but is presented without guarantee, warranty, or responsibility of any kind, expressed or implied.

Statements of suitability for certain applications are based on our knowledge of typical operating conditions for such applications, but are not intended to constitute – and we specifically disclaim – any warranty concerning suitability for a specific customer application or use.

This information is intended for use only by customers who have the requisite experience and capability to determine the correct products for their applications. Any technical advice inferred from this information or otherwise provided by us with reference to the use of our

products is given gratis, and we assume no obligation or liability for the advice given or results obtained.

Although we design and manufacture our products to the most stringent quality and safety standards, given the current state of the art, isolated component failures may still occur. Accordingly, customer applications which require a high degree of reliability or safety should employ suitable designs or other safeguards (such as installation of protective circuitry or redundancies) in order to ensure that failure of an electrical component does not result in a risk of personal injury or property damage.

Although all product-related warnings, cautions and notes must be observed, the customer should not assume that all safety measures are indicated or that other measures may not be required.
