Continuing it's rich tradition of partnering with high quality Japanese semiconductor suppliers, CEL is now partnering with THine from May of 2015 onwards.

THC63LVDM83C(5S)

REDUCED SWING LVDS 24Bit COLOR HOST-LCD PANEL INTERFACE

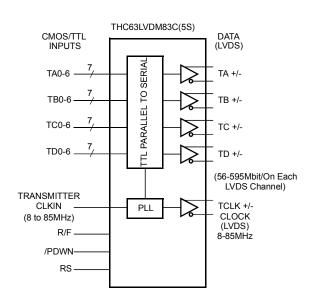

General Description

The THC63LVDM83C(5S) transmitter is designed to support pixel data transmission between Host and Flat Panel Display from NTSC up to SXGA+ resolutions. The THC63LVDM83C(5S) converts 28bits of CMOS/ TTL data into LVDS(Low Voltage Differential Signaling) data stream. The transmitter can be programmed for rising edge or falling edge clocks through a dedicated pin. At a transmit clock frequency of 85MHz, 24bits of RGB data and 4bits of timing and control data (HSYNC, VSYNC, CNTL1, CNTL2) are transmitted at an effective rate of 595Mbps per LVDS channel.

Features

- Wide dot clock range: 8-85MHz suited for NTSC, VGA, SVGA, XGA
- PLL requires no external components
- Supports spread spectrum clock generator
- On chip jitter filtering
- Clock edge selectable
- Supports reduced swing LVDS for low EMI
- Power down mode
- Low power single 3.3V CMOS design
- Low profile 56 Lead TSSOP Package
- 1.2 up to 3.3V tolerant data inputs to connect directly to low power, low voltage application and graphic processor.
- Backward compatible with THC63LVDM83R(24bits)

Note

1)Cable Connection and Disconnection

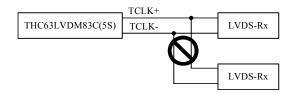

Don't connect and disconnect the LVDS cable, when the power is supplied to the system.

2)GND Connection

Connect the each GND of the PCB which THC63LVDM83C(5S) and LVDS-Rx on it. It is better for EMI reduction to place GND cable as close to LVDS cable as possible.

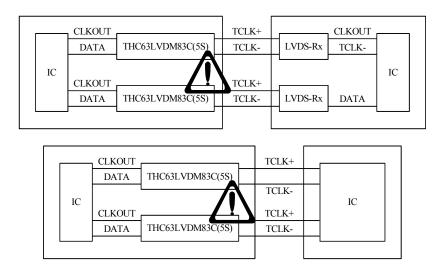

3)Multi Drop Connection

Multi drop connection is not recommended.

4)Asynchronous use

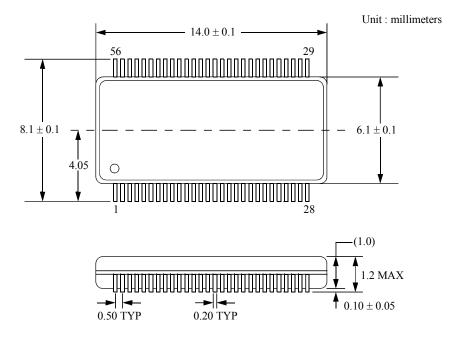

Asynchronous use such as following systems are not recommended.

5.1 Application of this product is intended for and limited to the following applications: audiovide deice, officce automation device, communication device, consumer electronics, smartphone, feature phone, and amusement machinedevice. This product must not be used for applications that require extremely high-reliability/safety such as aerospace device, traffic device, transportation device, nuclear power control device, combustion chamber device, medical device related to critical care, or any kind of safety device.

5.2 This product is not intended to be used as an automotive part, unless the product is specified as a product conforming to the demandes and specifications of ISO/TS16949 ("the specified Product") in this data sheet. Thine Electronics, Inc.("Thine") accepts no liability what so every for any product other than the Specified Product for it not conforming to the aforementioned demands and specifications.

5.3 THine accepts liability for demands and specifications of the Specified Product only to the extent that the user and THine have been previously and explicitly agreed to each other.

- 6. Despite our utmost efforts to improve the quality and reliability of the product, faults will occur with a certain small probability, which is inevitable to a semi-conductor product. Therefore, you are encouraged to have sufficiently redundant or error preventive design applied to the use of the product so as not to have our product cause any social or public damage.
- 7. Please note that this product is not designed to be radiation-proof.
- 8. Customers are asked, if required, to judge by themselves if this product falls under the category of strategic goods under the Foreign Exchange and Foreign Trade Control Law.
